TRANSFER PRICING IN INDIA 2020
TRANSFER PRICING IN INDIA

INTRODUCED IN INDIA
W.E.F. 1ST APRIL 2001

Indian legislation is broadly based on OECD Guidelines

Applicability

International transaction
Transaction with non-resident AE

Specified domestic transaction
(aggregate of specified transactions exceeding USD 3 million)

As per OECD, glossary of tax terms,

“Generally speaking, enterprises are associated where the same persons participate directly or independently in the management, control or capital of both enterprises, i.e. both enterprises are under common control.”

Definitions of AE in all major tax treaties of India including with US, UK, Singapore, Japan, UAE, etc. have been worded similar to OECD.
TRANSFER PRICING LITIGATION HIERARCHY

AO refers to TPO

TPO reverts to AO With TP calculations

Assessee accepts Draft Order?

AO forwards draft order to Assessee

3-4 years at AO/TPO level from end of financial year

Yes

May Appeal to CIT(A) Against final order

CIT (A) passes order

1 year from appeal (not binding – generally 2-4 years)

Revenue or Assessee can appeal

No

Appeals to DRP against draft order

DRP passes order

9 months from draft order (binding)

Only Assessee can appeal

Appeal in ITAT

4-5 years from filing the appeal

Last fact-finding authority On matters of law

ITAT passes order

High Court

Supreme Court
Major Issues/Litigations Open In Transfer Pricing

Enlisted here under are the major issues involved in transfer pricing:

1. Advertisement, marketing and Promotion (AMP) and marketing intangibles
2. Most Appropriate Method (MAM)
3. Selection of Comparables
4. Capacity Utilization Adjustment

1. AMP and marketing intangibles

- Indian company incurring AMP higher as compared to comparable companies
- Treated as an international transaction whereby Indian company is incurring AMP on behalf of foreign AE
- Basic reason being absence of registered trademark in India

Issues

- Disallowance of excessive AMP expenditure
- Indian company being treated as rendering service to the Foreign AE
- Transaction is treated as creation of marketing intangible by Indian company for the foreign AE

<tr>
<td>Sony Ericsson Mobile Communication India</td>
<td>[2015] 55 taxmann.com 240 (Delhi)</td>
<td>10 million</td>
<td>Assesssee in current AMP expenses towards promotion of brand in India, however, no reimbursement of expenses was made from foreign AEs.</td>
<td>TPO concluded that Assesssee was engaged in brand building or enhancing market in tangibles. Excess AMP was added back by applying BLT.</td>
<td>DRP accepted the TPO's approach</td>
<td>Case was remanded back to TPO by ITAT</td>
<td>Order passed in favour of Assesssee by deleting addition</td>
<td>SLP filed by revenue, accepted by SC but case is still pending</td>
</tr>
<tr>
<td>Maruti Suzuki India</td>
<td>[2015] 64 taxmann.com 150 (Delhi)</td>
<td>23 million</td>
<td>A licence agreement was entered between Assesssee and its holding company for using the co-branded trademark 'Maruti-Suzuki' on the vehicles. Assesssee incurred AMP expenses towards promotion of brand.</td>
<td>TPO benchmarked AMP by applying BLT and concluded that excess must be regarded as having been incurred for promoting the brand 'Suzuki' owned by holding company. Accordingly, he made the adjustment on account of AMP expenses.</td>
<td>DRP upheld the addition made by TPO</td>
<td>ITAT upheld assessment order.</td>
<td>Order passed in favour of Assesssee by deleting addition</td>
<td>SLP filed by revenue, accepted by SC but case is still pending</td>
</tr>
<tr>
<td>Bausch Lomb Eyecare India</td>
<td>[2016] 65 taxmann.com 141 (Delhi)</td>
<td>3 million</td>
<td>Assesssee had entered into an agreement with its AE for distribution of product manufactured by its group companies. Assesssee was promoting the B&amp;L brand by incurring expenditure on AMP.</td>
<td>TPO concluded that Assesssee was in the process of making the intangible even more valuable by incurring huge AMP expenses, bearing risks and using both its tangible assets and skilled, trained manpower. TPO opined that AMP expenses did not benefit the assesssee as it had incurred loss in the subject year and made the addition.</td>
<td>DRP confirmed said addition.</td>
<td>ITAT also confirmed the additions made</td>
<td>Order passed in favour of Assesssee</td>
<td>SLP filed by revenue, accepted by SC but case is still pending</td>

</tbody>
</table>
Landmark judgements and principles established

Sony Ericsson Mobile Communication India
- AMP activities are functions performed and not any transaction
- AMP expenditure incurred does not specifically lead to brand building or creation of intangibles

Maruti Suzuki India
- Bright Line test ("BLT") is not permitted under the law
- Onus is on the revenue to demonstrate the existence of International Transactions
- There is lack of statutory guidance on the approach and a machinery provision is absent.
- Benefit to the related party is only incidental
- No adjustment is warranted if transactions are held to be at an Arm's length

Bausch Lomb Eyecare India
- Benefit to the related party is only incidental
- Advertising and marketing promotion activities are functions performed and not any transaction

As a result of the numerous favourable judgements by different High Courts, the tax officers are currently doing protective assessments, since the matter will attain finality upon receiving decision of the Honourable Supreme Court

Matter pending for final adjudication at Supreme Court level
2. Most Appropriate Method

- Indian Income Tax Act does not provide any specific hierarchy of methods
- It insists on applying the ‘Most Appropriate Method’ (MAM)
- Rules specify factors for determining MAM, which are similar to factors stated in OECD guidelines:
  - Functional analysis
  - Availability of reliable information (in particular, on uncontrolled comparables)
  - Degree of comparability between the controlled and uncontrolled transactions
  - Reliability of comparability adjustments that may be needed to eliminate material differences between them
- Traditional / direct methods more preferred over transactional / indirect methods
- Other method is also a direct method - Toll Global Forwarding India (P.) Ltd. v. DCIT— [2015] 167 TTJ 57 (Del-Tri)

**TRADITIONAL TRANSACTION METHODS**

- **Comparable Uncontrolled Price (CUP)**
  - The price charged or paid for property transferred or services provided in a comparable uncontrolled transaction + Adjustments

- **Re-sale Price (RPM)**
  - [Re-sale Price charged by the tested party for the goods or services obtained from the AE to the unrelated party minus the normal uncontrolled gross profit and the expenses incurred by the assessee] + Adjustments

- **Cost Plus**
  - A sum of direct and indirect costs incurred and [normal uncontrolled gross profit + Adjustments]
### Transactional Methods

#### Profit Split (PSM)
- Employed in transactions involving transfer of unique intangibles. The combined net profit of the AEs in a transaction are compared to their relative contribution to arrive at apportioned transfer price profit.

#### Transaction Net Margin (TNMM)
- The net profit of the tested party is determined against costs incurred, sales affected or assets employed or any other relevant base and the same is compared against the net profit of comparables determined against the same base + Adjustments.

#### Other Method
- Any scientific or rational basis of proving that the transfer price was at arm’s length.

---

<tr>
<td>Toll Global Forwarding India (P) Ltd.</td>
<td>[2014] 51 taxmann.com 342(Delhi - Trib.)</td>
<td>298,573</td>
<td>Assessee offered multimodal transportation services to business shippers through global freight forwarding services. Assessee adopted industry-wide business model. In the industry-wide business model, residual profit (after deduction of related transportation cost) is shared equally between the associated parties. Therefore in absence of any uncontrolled price for the similar transaction undertaken by the Assessee, 50:50 ratio model was adopted by the Assessee as CUP method.</td>
<td>TPO having rejected CUP method, proceeded to adopt TNMM and thereby made certain additions to Assessee's ALP.</td>
<td>The DRP set aside objections raised by Assessee.</td>
<td>ITAT held that the business model of 50:50 was admittedly prevalent in the line of business activity of the Assessee and as is followed by the Assessee, thus indeed satisfies the test for determination of arm's length price. Assessee's contention to the effect that the arm's length price of services rendered to, or received from, the associated enterprises, which was computed on the basis of the same 50:50 model as is the industry norm and as has been employed by the Assessee for computing similar services to the independent enterprises, was at arm's length. Accordingly, the impugned arm's length price adjustment stands deleted.</td>
<td>HC upheld order of ITAT</td>

<td>NA</td>
<td>NA</td>
</tr>
<tr>
<td>Glenmark Pharmaceuticals Ltd.</td>
<td>[2019] 102 taxmann.com 438 (Mumbai - Trib.)</td>
<td>167,306</td>
<td>Assessee manufactures and exports pharmaceutical products to its various AE's and benchmark the same using TNMM.</td>
<td>TPO rejected TNMM method and used CUP method instead on the basis that Assessee is a manufacturer of pharmaceutical formulations and it is exporting the same product to various geographies including the local market.</td>
<td>CIT(A) rejected adjustment made by TPO</td>
<td>ITAT upheld the order of CIT(A)</td>
<td>NA</td>
<td>NA</td>
</tr>
<tr>
<td>Sodexo Food Solutions India (P) Ltd.</td>
<td>[2019] 103 taxmann.com 437 (Mumbai - Trib.)</td>
<td>14,99,628</td>
<td>Assessee applied TNMM while determining ALP, same was changed by TPO by making few adjustments.</td>
<td>The Ld. AO rejected the three years data used in TP report by the Assessee and opined that only the data of relevant FY was to be considered for comparability analysis. However revised margin so calculated by TPO was implied on all the transactions of the assessee at an entity level instead of international transactions</td>
<td>CIT(A) held that volume of international transactions with AEs constituted only 2.19% of the total payments and the adjustments, could not be extended to all transactions of assessee at an entity level, which had third party transactions as well. Therefore impugned additions were deleted.</td>
<td>ITAT upheld the order of CIT(A)</td>
<td>NA</td>
<td>NA</td>
</tr>
</tbody>
</table>
Principles held by the Honourable ITAT in the above judgements:

➤ Gujarat Glass Ltd.
  • Issue to be restored to Assessing Officer for determining ALP by applying any one of prescribed methods, where assessee was unable to justify its claim of CUP method as MAM and that TPO had not followed any prescribed method, but had determined ALP on purely estimation basis

➤ Glenmark Pharmaceuticals Ltd.
  • Where TPO had changed over to CUP method as MAM by rejecting TNMM consistently being applied by assessee without any change in facts and law, adjustment made by TPO was to be set aside

➤ Sodexo Food Solutions India (P.) Ltd.
  • Entity level TNMM cannot be applied to all transactions/cost base on gross basis as a whole and same has to be applied on proportionate basis to international transactions which are subjected to determination of ALP

3. Selection Of Comparable

- Selection of loss-making or abnormal profit-making companies as comparables
- Selection of companies with trading functions vs. agency functions
- Selection of companies catering to export markets to those catering to domestic markets
- Current Year vs. Multiple year data
- Selection of companies basis turnover, employee costs, transactions in foreign currency, etc.
- Comparison of high-end services with low-end services
Picking of comparables do not give rise to any substantial question of law

As a result

Litigations on selection of comparables may get closed at Tribunal level itself

<td>Comparables selected by Assessee rejected by TPO on account of non functional business</td>
<td>TPO in this case did not accept the benchmarking done by the Assessee and made an upward adjustment.</td>
<td>DRP upheld the order of TPO</td>
<td>Held that same issue has been dealt with for preceding year, which was in favour of the Assessee and followed the same</td>
<td>HC held that the present appeal doesn’t raises any substantial questions of law. In fact, in our limited jurisdiction, we cannot re-appreciate and reappraise the same factual findings to arrive at a different conclusion. Resultantly, the Appeal of revenue is fails and it is dismissed</td>
<td>NA</td>
</tr>
</tbody>
</table>
4. Capacity utilization adjustment

Applicability
- Allowed for early years of operation where comparables had on average higher utilization
- Where sizes of entities and level of activities differ

Principles
At present there is no authoritative guidance relating to capacity utilization adjustments but the decision of the Delhi Bench of the ITAT in the case of Clas India Private Limited [ITA No. 1783/Del/2011], has put forth useful observations and guidelines on capacity utilization adjustment, which are as under:

- It is essential to ascertain the percentage of capacity utilization by the taxpayer and the comparables when applying the TNMM.
- The difference in the percentage of capacity utilization of the taxpayer vis-à-vis comparables should be given effect to in the operating profit of comparables by adjusting their respective operating costs.

The ITAT explained that operating costs can be either fixed, variable or semi-variable:
- **Semi-variable costs** need to be split into fixed and variable part.
- The **variable costs** and the variable portion of the semi-variable costs remain unaffected due to any under or overutilization of capacity.
- The **fixed operating costs** and the fixed part of the semi-variable costs are scaled up or down by considering the percentage of capacity utilization by the taxpayer and such comparable.
